

Formula Name METHOCEL SOL INACTIVE 2% SOLN

Initials **Quantity** 1000 **MLS** **Schedule** 0 **Days to Exp** 180 **Date of Formula** 2/11/2021
Cost \$9.64 **Cost Per Unit** \$0.01 **AWP** **AWP Per Unit** \$0.00 **Last Review** 1/6/2016

Chemical Ingredients

Chemical Name	Form	Qty	Units	QS	Est Cost	Ha	Note
SODIUM BENZOATE NF	PWD	2.0000	GMS	☐	\$0.04		SOLUBILITY: 1:2 WATER(FS), 1:75 ALCOHOL(SL)
METHOCEL E4M PREMIUM (HYPROMELLOSE USP)	PWD	20.0000	GMS	☐	\$9.60		SOLUBILITY:N/A
PRESERVED WATER (PARABENS)	LIQU	0.0000	MLS	☒	\$0.00		SEE FORMULA FOR PRESERVED WATER (PARABEN)

Therapy**Description**

Clear colorless solution with thick foam bubbles

Classification(s) **Disease State(s)** **Instructions****A. Calculations/Special Considerations:**

Measure water prior to compounding (typically 1,000mL) as unable to QS compound due to foam

Use 2,000mL beaker as compound foams

B. Equipment Required:

Weigh boats; beakers; scales; homogenizer (prn); funnel; tape;

C. Method of Preparation:

1. Calculate required amounts and fill out compounding log
2. Measure out ingredients
3. In a large beaker, dissolve Sodium Benzoate in Preserved Water 50% of the final volume with the homogenizer
4. SLOWLY add Methocel and homogenize after each addition add 2-4 grams at a time
5. As needed, add more Preserved water to the mixture (NOTE: Do not start out with your desired volume of water as the addition of the Methocel E4M will cause an increase in volume)
6. QS to final volume with Preserved Water
7. Cover product and let sit at room temperature (usually overnight) to allow foam/bubbles to clear.
8. Have compound certified pharmacist perform final verification
9. Transfer contents to amber bottle
10. Label with lot number and expiration barcode
11. Tape Labels

D. Labeling:

Label with lot number and expiration barcode and ingredient(s) label.

Store in refrigerator auxillary sticker

E. Description of Finished Product:

Clear colorless solution with thick foam bubbles

F. Quality Control Procedures:

Physical appearance of compound verified by compounding certified pharmacist

Volume of final product is within 5% of intended batch size

Pharmacist signature: _____

G. Packaging Container:

Bulk store in UV protective amber bottle

Dispense in UV protective amber bottle with volume graduations
