Therapy**Description**

Opaque pinkish liquid with a sweet citrus smell

Classification(s) Water-Containing Oral**Disease State(s)****Instructions**

A. Calculations/Special Considerations:
None

B. Equipment Required:
Counting tray, Mortar & pestle, graduated cylinder, 60mL Luer Lock syringe, amber bottle, tape

C. Method of Preparation:

1. Calculate required amounts and fill out compounding log
2. Measure out ingredients
3. In a mortar, triturate Amlodipine tablets into a fine powder using the pestle
4. Wet powder with small amount of Ora-Blend
5. Pour suspension into 60mL syringe with black stopper at base
6. Rinse mortar and add remaining amount of Ora-Blend required to Q.S.
7. Using syringe to syringe method, mix suspension until uniform
8. Have compound certified pharmacist perform final verification
9. Transfer contents to amber bottle
10. Label with RX label and "Shake well" "Refrigerate" auxilliary label
11. Tape Labels

D. Labelling:

Label with lot number and expiration barcode and ingredient(s) label.
Store in refrigerator auxillary sticker
Shake Well auxillary sticker

E. Description of Finished Product:

Opaque pinkish liquid with a sweet citrus smell

F. Quality Control Procedures

Physical appearance of compound verified by compounding certified pharmacist
Volume of final product is within 5% of intended batch size

G. Packaging Container:

Bulk store in UV protective amber bottle
Dispense in UV protective amber bottle with volume graduations

H. Storage Requirements

Store refrigerated (36° - 46 °F)
Maximum BUD - 14 days

I. Formula Source:

PCCA 4624
