**Therapy****Description****Classification(s)****Disease State(s)****Instructions**

Equipment Needed:

Weigh boats; beakers; scales; homogenizer; funnel; tape

Labelling &amp; Storage:

Label with lot number and expiration barcode

Label with shake well sticker

Special Considerations:

Prochlorperazine 1mg = Prochlorperazine Maleate 1.62 mg

1. Calculate required amounts and fill out compounding log
2. Measure out ingredients
3. Dissolve Sodium Benzoate and Sodium Saccharin in water using the homogenizer
4. Wet Prochlorperazine with Ethanol in mortar
5. Add Prochlorperazine Maleate mixture to water mixture
6. Add Methocel, Marshmallow, and Tutti Frutti
7. QS to desired amount with Simple Syrup
8. Homogenize until evenly dispersed
9. Pour into container
10. Label with new bottle label, individual bar scan labels, and "Shake Well" label
11. Tape labels
