Instructions**A. Calculations/Special Considerations:**

This formulation is used for training purposes only

B. Equipment Required:

Beakers, weigh boats, scales, suppository mold, mortar & pestle, paper towels, microwave/hot plate, spin bars, labels and plastic containers

C. Method of Preparation:

Training purposes only

1. Calculate required amounts and fill out compounding log
2. Measure out ingredients
3. Melt SPG Base on the hot plate or in the microwave until liquified (~45 seconds then in 15 second intervals, if necessary)
4. Pour mixture into mold and, using the spatula, spread the mixture until each mold is full
5. Allow to harden at room temperature until solid (at least 2 hours)
6. Remove bolts, push down each suppository until it clicks, place mold on side and separate top mold by applying downward pressure to the lower mold
7. Individually weigh at least 10% of suppositories to ensure the weight is within 10% of theoretical weight
8. Package suppositories in amber suppository unit dose blisters
9. Have compound certified pharmacist perform final verification
10. Label blisters with prepack label foil sticker

Training purposes only

D. Labeling:

Label with lot number and expiration barcode and ingredient(s) label

Add prepack label if compound lot made to stock for multiple Rx's

Add Rx auxiliary label if compound lot made to order for a unique Rx
